SUMMARY

Motivated and detail-oriented Web Developer with hands-on experience in building responsive and interactive web applications using HTML, CSS, JavaScript, React.js, Firebase, and REST APIs. Skilled in developing dynamic frontend interfaces, integrating APIs, implementing authentication systems, and managing databases with basic SQL knowledge. Experienced in deploying and managing web applications using Netlify and Vercel, with familiarity in Git and GitHub for version control. Comfortable utilizing AI-powered development tools to improve productivity, optimize workflows, assist in debugging, and accelerate modern web development practices. Passionate about full-stack web development, problem-solving, and continuously learning modern web technologies to build scalable and user-friendly applications.

SKILLS

Languages

JavaScript, Java , SQL

Technology and tools

HTML, CSS, JavaScript, React.js, Firebase, Git, GitHub, Netlify, Vercel, Responsive Web Design, REST APIs

EDUCATION

PROJECTS

Spotify clone

Built a responsive Spotify-inspired web app with modern **UI/UX**, dynamic content rendering, and performance optimization using **JavaScript**. Implemented **JWT/OAuth**-based authentication and efficient database handling for a scalable user experience.

Gamehub

Developed an interactive mini-games platform featuring Rock Paper Scissors, Tic Tac Toe, Whack-a-Box, and Dots & Boxes using HTML, CSS, and JavaScript. Focused on game logic, **DOM manipulation**, **responsive UI design**, and dynamic state management to create engaging user experiences.

Other projects

Built multiple responsive web applications including CineVerse, portfolio websites, calculator tools, and API-integrated platforms using HTML, CSS, JavaScript, React.js, and Firebase. Focused on modern UI/UX design, responsive layouts, dynamic content handling, and performance optimization, with all projects successfully deployed using Netlify and Vercel.
